Introduction
Aistear Siolta Practice Guide: Introduction

Introduction

This introduction to the Aistear Siolta Practice Guide explains the purpose of, and audience for the Guide and outlines the meaning of the word ‘curriculum’ as used in Aistear, in Siolta and in the Guide. It also gives an overview of the structure of the Practice Guide and describes the aspects of Aistear and Siolta that it focuses on.

Purpose and audience

The purpose of the Practice Guide is to support practitioners in using Aistear: the Early Childhood Curriculum Framework (2009a) and Siolta, The National Quality Framework for Early Childhood Education (2006) together to develop the quality of their curriculum and in doing so, to better support children’s learning and development. The Practice Guide is based on the understanding that settings are compliant with, or are working to become compliant with The Child Care (Pre-School Services) (No. 2) Regulations (Department of Health and Children (DHC), 2006).

The Practice Guide includes a range of resources to help practitioners to critically reflect on their curriculum and to identify what works well. Additionally, the resources can help practitioners to identify priorities for development and to plan actions for positive change. In this way, the Practice Guide can be used for on-going review, development and improvement by individual practitioners, practitioners working together and by practitioners supported by a mentor.

Early Childhood Specialists working with Better Start, the National Early Years Quality Development Service will use the Practice Guide as they work with settings. The Practice Guide can also be used by other professionals working in a support or mentoring role, for example, by County and City Childcare Committees and by National Voluntary Childcare Organisations, and those working in an evaluation role. While the Practice Guide has been developed primarily for practitioners/stiúrthóirí working in part- and full-time daycare and sessional settings including naíonraí and Early Start Units in primary schools, others such as childminders, parents, early childhood students, trainers and lecturers might also find some of the materials useful.

1 A naíonra is a pre-school service for young children delivered through the medium of the Irish language, under the guidance of stiúrthóirí (pre-school practitioners) (Aistear, Principles and themes, 2009a, p.56).
**Síolta and Aistear**

In Ireland there are two early childhood frameworks—**Síolta** and **Aistear**. While similar in many ways as outlined in Table 1 taken from an audit of the two frameworks (2009b, p.5), **Síolta** is concerned with all aspects of quality in early childhood whilst **Aistear** focuses specifically on curriculum.

The Practice Guide draws the two frameworks together in a practical way and offers suggestions, ideas and examples of how they can be used to develop a curriculum that helps all children to enjoy and progress in their early learning and development. The following sections look at **Síolta** and **Aistear** in more detail.

**Table 1: Comparison of Síolta and Aistear: Purpose, audience and children**

Síolta, The National Quality Framework for Early Childhood Education

Síolta is the national quality framework for early childhood education. It encompasses all aspects of quality in early childhood settings for children from birth to six years. The framework includes principles, standards and components as shown in Table 2.

Table 2: Overview of the contents of Síolta

<table>
<thead>
<tr>
<th>12 Principles</th>
<th>↓</th>
<th>16 Standards of Quality</th>
<th>↓</th>
<th>75 Components of Quality</th>
</tr>
</thead>
</table>

The Practice Guide focuses only on the standards and components in Síolta that relate to curriculum. Standard 7: Curriculum states that encouraging each child’s holistic development and learning requires the implementation of a verifiable, broad-based, documented and flexible curriculum or programme. Nine other Síolta standards are particularly relevant to curriculum development work. These are:

- Standard 1: Rights of the Child
- Standard 2: Environments
- Standard 3: Parents and Families
- Standard 5: Interactions
- Standard 6: Play
- Standard 11: Professional Practice
- Standard 13: Transitions
- Standard 14: Identity and Belonging
- Standard 16: Community Involvement

Relevant components from other Síolta standards relating to curriculum are also reflected in the Practice Guide. To avoid duplication and in light of feedback on repetition gathered through the Síolta Quality Assurance Programme (QAP), some components have been grouped with similar-type components in one standard for the purposes of the Practice Guide. Table 3 provides more detail on these. The table uses bracketed numbers to refer to individual components in Síolta. The first part of each number refers to the relevant standard and the second part refers to the actual component. For example, (1.2) means Standard 1, Component 2.
### Table 3: Síolta standards and components covered in the Practice Guide

<table>
<thead>
<tr>
<th>Standard</th>
<th>Components</th>
</tr>
</thead>
</table>
| **1: Rights of the Child** | This standard is covered in the Practice Guide.  
All children will  
• be given choices, have choices respected (1.1).  
• be enabled to initiate activity, be appropriately independent (12) and through their active participation and consultation be considered a partner by the adult (13) (4.1). |
| **2: Environments** | This standard is covered in the Practice Guide.  
• The indoor and outdoor environments are well-laid out, well planned (2.1) and comfortable and well-maintained (2.3) to provide a pleasant environment for children and adults.  
• The indoor and outdoor environments are adaptable and accessible (2.2) (6.2) with an appropriate amount of materials, resources and equipment (2.7) (6.4).  
• The indoor and outdoor environments provide a range of developmentally appropriate, challenging, diverse, creative, culturally appropriate and enriching experiences for all children (2.5 and 2.6).  
• Components related to safety (2.4) and food management (2.8) are outside the remit of the Practice Guide. |
| **3: Parents and Families** | This standard is covered in the Practice Guide.  
• There are formal and informal opportunities for communication, consultation (4.1) and mutual information sharing about children (3.1) (12.2) with a variety of opportunities for parents to be involved (3.2).  
• Staff are sensitive and supportive in their interactions with parents (3.3) (11.5).  
• Component 3.4 related to policies and procedures is outside the remit of the Practice Guide.  
• Component 16.1 related to the availability of information on local, regional and national resources, is covered in relation to supporting children’s learning and development. |
| **4: Consultation** | One component is covered in the Practice Guide.  
• Consultation with children (4.1) is included in Standard 1, consultation with parents (4.1) in Standard 3, consultation with staff (4.1) in Standard 11.  
• Other consultation activity to which this standard refers is related to management and goes beyond the remit of the Practice Guide. |
<table>
<thead>
<tr>
<th>Standard</th>
<th>Components</th>
</tr>
</thead>
</table>
| 5: Interactions | This standard is covered in the Practice Guide.  
- Children are enabled to interact and play (6.6) with peers and other ages in pairs, small groups and to a lesser degree in large groups (5.1) and are supported to interact positively (5.2).  
- Adults use all aspects of the daily routine, including mealtimes (9.4) to interact sensitively with children (5.3) and the interactive style is balanced and focused on process, following children’s leads and promoting language (5.4).  
- All interactions support the development of close nurturing relationships (9.6) through the effective use of a Key Person Approach.  
- Adults model good, respectful interactions in their interactions with each other (5.5).  
- Component 5.6 related to policies and procedures is outside the remit of the Practice Guide. |
| 6: Play | This standard is covered in the Practice Guide.  
- Providing adequate time for play is included as part of the daily routine (6.1). Opportunities to achieve mastery and success through play (6.3) and enabling children to be creative and make new meaning (6.5) are also provided. Documenting, planning and assessment element is also included (6.7).  
- Accessibility of materials (6.2) (6.4) are covered in Standard 2 and aspects relating to interactions (6.6) are covered in Standard 5. |
| 7: Curriculum | This standard is covered in the Practice Guide.  
- The holistic nature of curriculum (7.1), drawing on research and well-referenced (7.2), the importance of spontaneous learning and child initiated activity is advocated (7.3).  
- The relationships aspect of curriculum (7.4) (9.6) and the relationship aspects of effective transitions (13.1) are covered.  
- Documentation, planning and assessment are important in supporting children’s learning and development (7.5 and 7.6). |
| 8: Planning and Evaluation | This standard is not explicitly covered in the Practice Guide. However, much of the content of the PG helps practitioners meet this Standard. |
| 9: Health and Welfare | Two components in this standard are covered in the Practice Guide.  
- Social aspect to mealtime (9.4) and relationships (9.6) are addressed in Standard 5.  
- Other components relate to management and regulation and are outside the remit of the Practice Guide. |
| 10: Organisation | Three components in this Standard are covered in the Practice Guide.  
- Vision, values and principles (10.1), practitioners valued as professionals (10.4) and teamwork (10.5) are addressed in Standard 11.  
- Other components relate to management and are outside the remit of the Practice Guide. |
<table>
<thead>
<tr>
<th>Standard</th>
<th>Components</th>
</tr>
</thead>
</table>
| **11: Professional Practice** | This standard is covered in the Practice Guide.  
- All adults in the setting can provide evidence that they have achieved levels of skills and knowledge appropriate to their role and responsibilities (11.1).  
- All adults will contribute to and subscribe to a set of values and principles (10.1 and 11.2) which will inform their practice.  
- Reflective practice will be supported and encouraged (11.3) and this will be augmented by regular opportunities for on-going professional development (11.4).  
- All practitioners are valued in their role as professionals (10.4) and as such will be consulted with (4.1) and teamwork will be encouraged and supported (10.5).  
- As professionals, confidentiality (12.3) is integral to practice.  
- Professional practice related to families (11.5) is covered in Standard 3. |
| **12: Communication** | Two components in this standard are covered in the Practice Guide.  
- Sharing information with stakeholders (12.2) is addressed in Standards 3 and 13. Confidentiality (12.3) is addressed in Standard 11.  
- Collection of information (12.1) relates to management and is outside the remit of the Practice Guide. Component 12.4 related to policies and procedures is also outside the remit of the Practice Guide. |
| **13: Transitions** | This standard is covered in the Practice Guide.  
- Smooth transitions are facilitated and promoted through relationships (13.1), liaison within and between settings (13.2) and through consultation and communication (12.2) with all stakeholders (13.3).  
- Component (13.4) related to policies and procedures is outside the remit of the Practice Guide. |
| **14: Identity and Belonging** | This standard is covered in the Practice Guide.  
- The setting promotes a confident self and group identity (14.2) and an understanding of the needs and rights of others (14.3).  
- Component 14.1 related to policies and procedures is outside the remit of the Practice Guide. |
| **15: Legislation and Regulation** | This standard is not explicitly covered in the Practice Guide. However, the PG is based on the understanding that settings are compliant with, or working to become compliant with all relevant legislation and regulation. |
| **16: Community Involvement** | This standard is covered in the Practice Guide.  
- The setting is connected and integrated with the local and national community and has links which have the potential to develop these relationships further (16.2 and 16.3).  
- The setting actively supports children’s citizenship in their local and national community (16.4).  
- Component 16.1 related to the availability of information on local, regional and national resources, is addressed in Standard 3: Parents and Families. |
Whilst many of Síolta’s standards and components outline good practice in relation to the development of a high quality curriculum, Aistear provides detail about how children learn and develop in early childhood and describes the types of experiences and learning opportunities that are important for them during this time.

### Aistear: the Early Childhood Curriculum Framework

Aistear is the early childhood curriculum framework. It is not a prescriptive programme that sets out activities and worksheets for babies, toddlers and young children. Such a programme would not promote an image of children as competent and confident learners or do justice to early childhood practitioners’ professional role as curriculum developers. Instead, the Aistear framework provides information and practical ideas to help practitioners plan and build a curriculum that supports children to develop positive dispositions, skills, attitudes and values, as well as knowledge and understanding.

Aistear includes principles, themes and guidelines for good practice as shown in Table 4.

#### Table 4: Overview of the contents of Aistear

<table>
<thead>
<tr>
<th>Themes</th>
<th>Guidelines for Good Practice</th>

</tr>
</tbody>
</table>
Aistear states that curriculum refers to all the experiences, formal and informal, planned and unplanned in the indoor and outdoor environment, which contribute to children’s learning and development (Principles and themes, p.54). In developing a curriculum, practitioners respond to children’s interests and questions, extend their learning and promote challenge and engagement through enjoyable and motivating experiences. The Practice Guide supports practitioners in using Aistear’s principles, themes and guidelines to develop this type of curriculum and in doing so, to meet relevant standards and components set out in Síolta.

**Curriculum for all children**

Síolta and Aistear support the learning and development of all children from birth to six years across a range of early childhood settings and through the provision of an appropriate curriculum. A curriculum is more than the daily routine or a list of activities and experiences. It is more than naming a philosophy or approach to early childhood care and education. It is about the totality of children’s experiences—the broad goals for their learning and development, the activities and experiences through which they can learn and develop, the approaches and strategies practitioners use to support and enable them to achieve their goals and the environment in which all of this takes place. The curriculum also includes the unintended impact of experiences, routines and practitioners’ values and beliefs on children which is often referred to as the ‘hidden curriculum’.

Aistear and Síolta reflect a socio-cultural view of how children learn and develop during these early years. In practice, this means the early childhood curriculum acknowledges the important influence that family, peers, community, background and culture have on children’s learning and development. Children live in diverse communities and bring their early experiences at home, with their families and communities to the setting. They also bring individual strengths, abilities, dispositions, values and attitudes, knowledge, interests and needs as well as their own theories and ideas about how the world works, to the setting. Children learn and develop at different rates, in different ways and at different times and the curriculum needs to respond appropriately. The curriculum can also provide opportunities for children to learn and use the Irish language and to experience Irish culture and heritage to nurture this important aspect of identity and belonging in Ireland.
For some children, learning and development brings particular challenges. This can require practitioners to use specific interaction strategies, provide and use particular resources in the learning environment, and/or communicate in specific ways to help children understand, join in conversations and play an active part in, and benefit from experiences and activities. Every child has an ability to learn and develop and each child follows his/her own learning journey.

_Aistear_ and _Síolta_ together can guide practitioners in developing and providing an emergent and inquiry-based curriculum that motivates, engages and appropriately challenges all children as learners and enables them to progress in their individual learning journeys. This links with the aims of the _Primary School Curriculum (1999)_ to enable the child to live a full life as a child and to realise his or her potential as a unique individual and to develop as a social being through co-operating with others (DES, 1999, p.7).

**Developing an emergent and inquiry-based curriculum**

Drawing on the early childhood sector’s experiences with _Aistear_ and _Síolta_, the Practice Guide uses the concept of an emergent and inquiry-based curriculum to help practitioners to use the two frameworks together. An emergent and inquiry-based curriculum uses children’s and practitioners’ interests, questions and experiences as starting points for curriculum planning. At times, topics emerge from children’s interests. Their engagement with people, materials, ideas and events triggers their curiosity and motivation to learn.

At other times, practitioners introduce specific topics linked to _Aistear’s_ learning goals to support children’s learning and development. In partnership with children, practitioners identify ideas or inquiries that become the focus for learning. Observant, skilled and supportive practitioners harness this child-initiated interest, know when it is appropriate and helpful to provide new opportunities or topics for children to explore or when to use adult interests as a stimulus for learning to create a relevant, meaningful and stimulating curriculum for all children.

_Aistear_ and _Síolta_ show that an early childhood curriculum involves a practitioner:

1. getting to know children well and remembering that they bring a wealth of experience from home and are learning all the time through play and planned experiences, and from conversations, actions and interactions throughout the day.
2. understanding that children have individual abilities, knowledge, dispositions, needs, interests and challenges as well as theories about how the world works and acknowledging the importance of a curriculum that responds to this diversity.
3. knowing how to support and extend learning and development at this early stage in children’s lives.
4. using information gathered through daily work to review and reflect on the impact of the curriculum and of his/her work on children’s learning and development to ensure that all children’s holistic development is being supported appropriately.

5. using Aistear’s learning goals which outline dispositions, skills, values and attitudes, and knowledge and understanding in order to plan for and assess children’s learning and development.

6. sharing this vision of early learning and development with others such as colleagues, children’s families and professionals such as mentors, inspectors, speech and language therapists and primary school teachers.

Babies, toddlers and young children need a variety of appropriate learning experiences to support their holistic development and to help them reach their individual potential. Seeing all children as competent and confident involves the practitioner supporting children to get the most benefit from these experiences. The Practice Guide helps practitioners to do this in a way that supports all children.

Over time, children’s theories and knowledge about how things work and why progress to understanding more formal concepts and ideas. They use different ways to communicate progression in their thinking, knowledge and understanding including movements and gestures, talking, drawings, plans, models, making marks and using symbols in inventive ways. At the same time, babies, toddlers and young children develop an expanding repertoire of skills at an increasingly sophisticated level. They demonstrate a range of dispositions, values and attitudes in how they approach and respond to experiences and in how they interact with others. The practitioner reflects on all of this to build a rich picture of each child’s learning and development and uses this information to plan for and extend learning.
The practitioner’s role

The role of the adult in early childhood is central. Aistear highlights that early learning takes place through a reciprocal relationship between the adult and the child – sometimes the adult leads the learning and sometimes the child leads. The adult enhances learning through a respectful understanding of the child’s uniqueness. He/she alters the type and amount of support as the child grows in confidence and competence, and achieves new things (Principles and themes, p.9).

Aistear describes a range of interaction strategies for practitioners to use to support babies’, toddlers’ and young children’s learning and development. Aistear’s User Guide also outlines some of the knowledge, dispositions, skills and abilities that practitioners working with children need (p.7).

Síolta also has a principle on the role of the adult which states that the role of the adult in providing quality early childhood experiences is fundamental. Quality early childhood practice is built upon the unique role of the adult. The competencies, qualifications, dispositions and experience of adults, in addition to their capacity to reflect upon their role, are essential in supporting and ensuring quality experiences for each child. This demanding and central role in the life of the young child needs to be appropriately resourced, supported and valued (2006, p.8).

Síolta’s principle on team work is also relevant as is the standard on Professional Practice. The Practice Guide embraces the role of the adult as outlined in Aistear and Síolta and develops it with a particular focus on the role as curriculum developer. An important part of this is pedagogical leadership which is explored in detail in Curriculum Foundations.

Using the Practice Guide

The Aistear Síolta Practice Guide is intended to help you in your role as curriculum developer to build, reflect on and extend your curriculum to support babies’, toddlers’ and young children’s early learning and development. Some resources in the Guide focus on a specific age group—babies and toddlers (birth-3 years) and young children (3-6 years)—while other resources are relevant across the full early childhood period of birth to six years. Drawing on the early childhood sector’s experiences of using Aistear and Síolta, the Practice Guide includes:

- Curriculum Foundations and
- six interconnected Curriculum Pillars:
  1. Building Partnerships with Parents
  2. Creating and Using the Learning Environment
  3. Learning through Play
  4. Nurturing and Extending Interactions
  5. Planning and Assessing using Aistear’s Themes
Curriculum Foundations

Curriculum Foundations comprises an overview and four elements as set out in Table 6. Together, the elements provide focus for an exploration of the factors, values and principles that significantly impact on and shape the curriculum which practitioners develop and provide for the children in their setting. It is important that practitioners work on the four elements of Curriculum Foundations before undertaking work on Curriculum Pillars.

### Table 6: Overview of elements in Curriculum Foundations in the Practice Guide

<table>
